

WANTED

HAVE YOU SEEN THIS WEED?

FAST SPREADING * HIGHLY INVASIVE * WILDFIRE FUEL

Help prevent wildfires!

Remove fast-moving invasive Globe Chamomile as soon as you see it!

Explore your property and be diligent about pulling it now before yellow ball flowers develop mature seeds and dry out in our summer heat. Plants resemble a carrot plant with dark green leaves and a strong odor.

Just one pull will prevent the spread of thousands of seeds. Invasive plants upset the sensitive and natural ecological balance of the surrounding area and can also disrupt the habitat for desert wildlife. In addition, it could become a major fire fuel source during the hot weather when these weeds dry out.
